STANDARD TILES

FLEXFIT TILE HOOK

This cost-effective tile hook features a snap-in rail attachment clamp and height adjustment. Unlike typical fixed tile hooks for PV systems, the NOVA Steel Tile Hook offers two vertical adjustment positions for greater versatility on tiled roofs. It can also be positioned off-center to adapt to various roof configurations.

QUICKFIT TILE HOOK

Offers versatile installation without drilling. It hooks onto roof purlins for flexible positioning and is preassembled with a snap-in rail attachment for easy rail installation. Suitable for all standard roof tiles with lath thickness of 33mm–58mm, tile thickness of 65mm–85mm, and pitches of 10°–60°, the NOVA aluminum tile hook is compatible with a wide range of roofing configurations.

BITUMEN ROOF

ANCHOR PLATE

The NOVA Anchor Base Plate enhances the stability and safety of solar installations on bitumen roofs by distributing weight more effectively. It provides superior water sealing compared to traditional hanger bolt systems and offers versatile mounting options with screws or anchor bolts, accommodating various roof types.
